

FREE ELECTRIC WATER HEATER

when you switch from a propane or natural gas-fueled water heater and join MiEnergy's Energy Management Program

Why choose an electric water heater?

It's a smart energy choice!

Modern, large capacity electric water heaters keep the water hot until you need it. When combined with MiEnergy's energy management program, the electric water heater runs like a "smart appliance," providing stability and efficiency to the power grid by heating water when demand for electricity is low and storing it for later use.

 No flames. No fumes. Free service calls during normal business hours.

Are you building a new home? Switching from gas to electric?

Contact MiEnergy today to learn how to get a free 85- or 105-gallon Marathon electric water heater!
