## Off-peak home charging rate programs for electric vehicles

Whether it is a flat fee of \$35 per month or a per kWh rate, MiEnergy has great rate programs for charging electric vehicles at home during off-peak hours. Off-peak charging keeps the grid reliable and helps save members money on charging their vehicle. If you drive at least 1,000 miles per month, you could save almost \$300 a year by charging off-peak on MiEnergy's programs.

### Contact MiEnergy for more information on:

- Federal tax credits available (up to \$1,000) for the installation of a Level 2 charger- expires on June 30, 2026.
- MiEnergy rebates on home chargers and installation for members on an electric vehicle charging program.
- Visit [www.MiEnergy.coop/EVcharging](http://www.MiEnergy.coop/EVcharging) for details on rates.
