

OFFICIAL NOTICE OF RATE CHANGE FOR JULY 1, 2020

This document is an Official Notice that includes specific legal language and information for members about a change in electricity rate tariffs.

On February 27, 2020, the MiEnergy Cooperative Board of Directors approved a change in electric rate tariffs affecting prices for electricity service that you receive. This will apply to your electricity consumption beginning July 1, 2020.

The increase in annual revenues to the cooperative is projected to be zero percent based on historical energy sales. Changes in the rate tariff components such as the basic service charge and kilowatt-hour (kWh) charges, increased and decreased as part of MiEnergy Cooperative's rate transition for recovering of distribution costs. The last rate change for members was May 1, 2018.

The impact of the rate change on your bill will vary depending on your rate class and energy consumption. City and suburban rate classes will see a kWh rate reduction. There are no changes to the large commercial and peak alert rate classes. The rural, general purpose small and small commercial classes have an increase in the basic service charge, but a reduction in the kWh rate. The general purpose class has an increase in the basic service charge and an increase in kWh rate. The new rate tariffs are listed below.

Rate Class	Current Daily Basic Service	July 1 Daily Basic Service	Current kWh Rate	July 1 kWh Rate	Current Demand Rate	July 1 Demand Rate
